NOTES & LIMITATIONS

1. **Runsheets/Abstract Limitations:** The runsheet/abstract(s) upon which this opinion is based was limited as provided therein in accordance with your specific instructions and/or knowledge. We assume that you are familiar with the inherent dangers of limiting any examination of the public records and are willing to accept any risk in connection therewith. Accordingly, this opinion is limited to the specific instruments disclosed by the runsheet/abstract(s), unless set out separately elsewhere in the materials examined.
2. **Reliance Upon Affidavits and Recitals:** It is common practice in Texas to rely upon recitals of fact included within Affidavits or other instruments which have been filed of record; however, an Affidavit does not guarantee good title. Reliance upon recitals in an Affidavit always carries a business risk, and we assume that you are willing to accept this risk.
3. **Capacity:** Unless otherwise addressed herein, we have assumed that all parties have necessary authority to execute instruments in the chain of title in a capacity other than individually.
4. **Investigate Surface Use and/or Tenancy:** Determine if any party claims an interest in the surface of the subject lands that is not reflected in this opinion. Any party claiming an agricultural, hunting, grazing, or other surface use or license, other than the record owners, should execute a Tenant's Consent Agreement. Prior to beginning operations, determine the location of any surface use and the degree to which your operations may interfere with these uses and estates, including airspace.
5. **Advisory Comments:** We have assumed that the addressee hereof, for whose benefit and use this opinion is submitted, is knowledgeable of Texas Land Titles and of proper operational procedures in the oil and gas industry. An "Advisory" Comment does not necessarily mean that no action is necessary, but that a prudent course of action should be taken.
6. **Issues Not Addressed Herein:** This opinion does not cover issues normally addressed by a surveyor such as boundary, area, excesses, conflict with adjacent tracts or surveys, on the ground location, or access to public roads, and does not address dedication of gas, surface tenants, payment of bonus or delay rentals, perpetuation of the lease by production or other means, compliance with Railroad Commission of Texas rules or regulations, or other like matters, unless they are specifically addressed herein. Neither does this opinion cover unrecorded production purchase contracts, bills for labor or materials that may ripen into mechanic's or materialman's liens, rights of persons in possession, competency of parties, homestead rights, fraud, duress, undue influence, forgery, delivery, alteration after delivery of instruments, unrecorded instruments not disclosed by the materials examined, errors of public officials in indexing or recording instruments, or other matters not specifically disclosed by the materials examined.
7. **Plats are for Informational Purposes Only:** The maps or plats attached to this opinion are included for illustrative purposes only. We have made no survey of the subject lands, and we assume no responsibility or liability in connection with reliance on the maps or plats included herein.

This opinion is rendered for the sole benefit of EOG Resources, Inc., and we expressly disclaim any duty to entities or persons other than EOG Resources, Inc. No person or entity other than EOG Resources, Inc. may rely upon this opinion or any of the factual matters or opinions stated herein, including non-operating interest owners, co-owners, mortgagees, lienholders, purchasers, or prospective purchasers of the interests of EOG Resources, Inc.

Thank you for allowing us to be of service to EOG Resources, Inc.

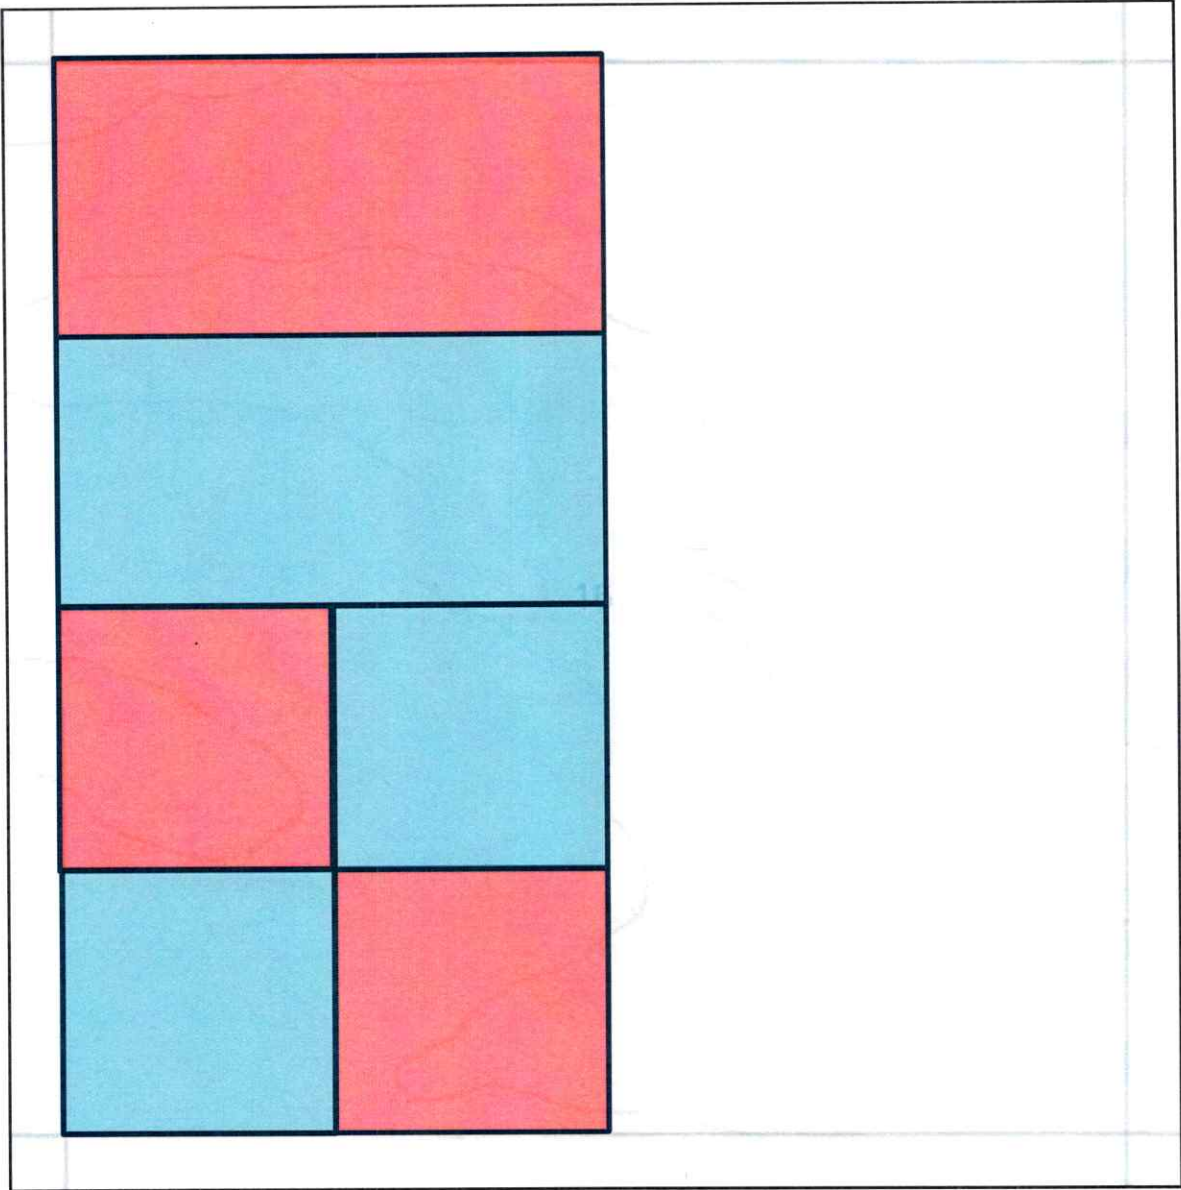

Sincerely,

Ben Holliday
